

Community Clinics

The community clinics, Sunset, Excelsior and Gellert Health Services, offer a wide range of primary services and specialties.

The team of doctors, nurse practitioners, registered dietitians, and specialties is dedicated to caring for patients of all ages and their families.

In 2016, the Hospital opened Chinese Hospital Outpatient Center to broaden its existing network of community clinics. Located in Daly City, the new outpatient center will offer primary care, optometry, pharmacy, imaging, east-west medicine, and other specialty care services, all at one convenient location.
