

# Dietary Services

The Dietary Department prepares nutritious meals according to your diet orders prescribed by your physician. Your diet, like your medication, is important to your recovery. A Registered Dietitian (RD) performs nutritional assessments and provides appropriate interventions and recommendations. RDs also provide diet instruction and drug-food interaction education to you and your family. If you would like more information from the RD upon discharge, please call 1-415-677-2307.
