

Our COVID-19 Responses

To prepare for the surge of COVID-19 cases, Chinese Hospital had to redirect resources and postpone many elective surgeries and procedures. It was a difficult decision because we recognize the importance of receiving timely treatment and care for our patients and the community.

Now, we are safely resuming scheduled services and procedures at the hospital. Patients whose care was postponed are being contacted to schedule appointments. For more information, please contact your physician. Prefer to see us from the comfort of your home? Through our easy to use telehealth platform, our providers are available and accessible virtually for primary care, follow-up visits, medication monitoring, or other needs. Book a telehealth appointment today by calling our clinic locations. A dedicated advice line has been established to provide expert advice and information about COVID-19. Call 1-628-228-2828 to speak with us about your questions and concerns. We can help direct you to the appropriate care. Chinatown is the second densest neighborhood in the U.S. As COVID-19 is primarily spread from person to person, testing is one of the keys to slowing the spread of COVID-19 and helps the community. Therefore, in collaboration with SFPD and SRO owners, we build a testing and prevention program for San Francisco Chinatown SROs. The program offers COVID-19 testings for SRO tenants, and SFPD will perform contact tracing if needed. As of 04/2022, we have served 30 SROs in Chinatown community. In collaboration with SFPD, City and County of San Francisco and other community-based partners, Chinese Hospital offers COVID testings for San Francisco residents. In partnership with SFPD, Chinese Hospital host a walk-in COVID-19 vaccination clinic at our Chinatown location. In an effort to provide convenient access to vaccination, our community clinics are also offering COVID-19 vaccinations. As of 4/1/2022, we have administered over 50,000 doses of vaccine to our communities, in accordance with state and local county guidelines.

Chinese Hospital looks forward to continuing to work with our local county and state partners to administer vaccines to our community as quickly as possible.
